EDUCATION

Binus University

Computer Science

Cumulative GPA: 3.34/4.0

Tangerang Selatan, Banten

Sept, 2024 - 2028

PROJECTS

Thriftverse

Fullstack Developer

- Designed and developed a full-stack e-commerce marketplace for second-hand clothing, enabling users to create custom storefronts and list products effortlessly.
- Built responsive, high-performance UI components using React and Tailwind CSS to deliver an intuitive user experience across all devices.
- Integrated RESTful APIs, user authentication, and dynamic catalog filtering to streamline order management and product discovery.

SpoJeDy

Multimedia/Frontend Developer

- Co-developed a responsive music and video streaming web app equipped with persistent global playback across page transitions.
- Engineered interactive player controls, dynamic audio-to-video switching, playlist management, and custom dark/light theme support.
- Implemented Local Storage API and ImageCDN Kit for seamless client-side state management, media asset delivery, and profile customization.
